

Nome: _____ nº: _____ T. _____ Data: _____

6.7.11a Testes e Classificação de Triângulos

1. Triângulo que possui três lados iguais:

- a) Retângulo b) Isósceles c) Equilátero d) Escaleno

2. Triângulo que possui um ângulo obtuso (mais de 90 graus):

- a) Isósceles b) Obtusângulo c) Acutângulo d) Retângulo

3. Triângulo que possui três lados diferentes:

- a) Escaleno b) Isósceles c) Acutângulo d) Equilátero

4. Triângulo que tem um ângulo reto:

- a) Obtusângulo b) Isósceles c) Equilátero d) Retângulo

5. Classifique os triângulos em Equilátero, Isósceles ou Escaleno:

6. Classifique os triângulos em Acutângulo, Obtusângulo ou Retângulo:
